STEP 1:

The Leg's [B] can be installed facing either inwards or outwards based on user preference.

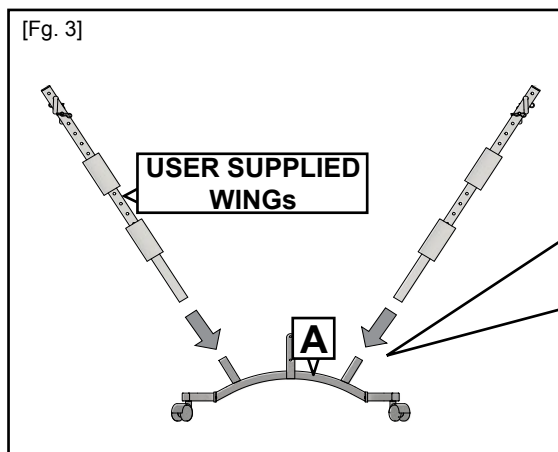

Connect both Legs [B] to the Base [A] using two (2) 6mm Bolts [C] to secure each Leg as shown. [Fig. 1 & 2]

STEP 2:

Transfer the Wings from your V-Rack carrier model (not included) and slide the Wing onto the Base [A] and align the holes on the edge of the Wing with holes located on the Base. [Fig. 4]

Secure the Wings to the Base [A] using either a Wire Lock Pin or Ring Pin (depending on your VRack carrier model). [Fig. 3]

OPERATION: BICYCLE MOUNT

Hang bicycles by the tires on the Wheel Cradles (user supplied) with the chain rings to the outside. [Fig. 5]

Adjust the Foam Bumpers located on the Wings to protect the frame of the bicycle.

IMPORTANT: For two bicycles, position the bicycles facing in opposite directions (front-to-back/back-to-front) **with the chain ring to the outside.**

Some adjustment of the Wheel Cradles may be necessary in order to accommodate both bicycles.

⚠ CAUTION:

Never exceed the maximum 60 lbs per bicycle weight rating. Do not stand, sit, climb, or hang on or use the V-Tree for any other purpose than intended.
